

2026 Peer Reviewer Evaluation Form – Grid Integration & Field Validation

Evaluation Criteria and Scoring Scale

Evaluate the DOE/OE Energy Storage Program by answering the questions below. Each question should receive one score from the Scoring Scale. Half points are acceptable.

9-10 Excellent
7-8 Very Good
5-6 Good
3-4 Fair
0-2 Not Adequate

1. Is the project/codes and standards work well-aligned with the DOE Energy Storage program mission?
DOE OE's Core Mission: OE drives electric grid modernization and resiliency in the energy infrastructure. OE leads the Department of Energy's efforts to ensure a resilient, reliable, and flexible electricity system. OE accomplishes this mission through research, partnerships, facilitation, modeling and analytics, and emergency preparedness.
2. Did the project/codes and standards work leverage appropriate partnerships and collaboration to ensure project success?
3. Did the project/codes and standards work appropriately reference previous work in the area and incorporate lessons learned from past efforts?
4. Assess the level of impact the project/codes and standards work will have on the overall energy storage community.
5. Utilizing the scale provided previously, how well does the researcher highlight the overall impact of the project?
6. Did you feel the additional review sessions on Monday, July 27th assisted in your evaluation? Why or why not?
7. Additional comments or suggestion
